

Week Ending:
Friday 13th March

Dosbarth Rheidol News at Ysgol y Ddraig

Reminders

•**PE Kits** - We still have a number of PE Kits outstanding in Year 2. It is essential that they are dressed in PE kit for children to participate fully in their physical activity sessions. Spare kit (lost property) will be given to children who do not have a PE kit in school to allow them to participate.

•**End of the Day** - We have been working really hard to encourage the children to look after our items in the outdoor area and tidy up appropriately at the end of each day. Therefore we politely ask that you remind your child/ren not to play with any of the toys at pick up time, when waiting to collect your Year 2 child or after collection. Thank you!

Dosbarth Rheidol Show and See

We will be holding our annual Show and See on **Monday 30th March at 2pm**. This year we are continuing our 'superheroes' theme and hoping to celebrate our own real life superheroes (family members) during the event by preparing a mini afternoon tea. To help us prepare for our afternoon tea, we will be sending invites home next week. It is really important that we have **all RSVPs returned by Friday the 27th March** to allow us to buy/prepare enough food and drink for everybody.

There will also be an opportunity for your child/ren to share their work books with you and engage in some of their favourite learning challenges from this term.

We hope everyone has a lovely weekend!

Miss Cogbill and Miss Rose.

This week ...

We used J2e5 on the computers to help design our own invites for our Show and See celebration next week. We discussed what important information needed to be on the invite and appropriately chose different colour fonts, using bold and italics to make certain details stand out.

We have enjoyed celebrating 'British Science Week' by exploring our WeDo lego sets. We worked as a team to create the robot 'Milo' and then learnt how to use code to make him move. Also, we had a note from Richard the coast guard to explain he had ripped his waterproof coat whilst rescuing someone. He asked us to investigate which materials were waterproof and decide which material he should use to fix his coat. We recorded our results in a table and also made sure we conducted a 'fair test.' To conclude our Science Week celebrations we had a fantastic time at Techniquet exploring the equipment and watching a super Science show. Back at school we wrote a recount of our trip using time connectives such as first, next, then etc. Diolch to all of our volunteers who helped to make the trip a success!
