

Class News

Dosbarth Teifi a Dosbarth Caerdydd

Week Ending: Friday 25th May 2018

Annwyl Rhieni/ Dear Parents,

After investigating the properties of 2D shapes, we started off the week by investigating the properties of 3D shapes. Both classes looked for examples of 3D shapes inside and outside of the school building. We also constructed nets of pyramids, cones, cylinders and cubes. In ICT, we created a power point, highlighting the particular properties of 3D shapes.

We have been reflecting and translating shapes in different quadrants using co-ordinates and symmetry.

As part of our continuing work on Beast Creator, we have been creating our own encyclopaedia pages. We began with an introductory paragraph, moving onto a more specific, detailed paragraph and included a labelled diagram using Book Creator. Next, we added further facts and a glossary explaining any scientific terminology.

In science, we watched BBC Bitesize clips in order to understand lifecycles of plants and animals, culminating in a quiz. We saved our information into our Pupil Data folders.

Following last Thursday's #Crafternoon, we have been painting our flour/water paste resist pictures and removing the outline. Our willow framed minibeasts are currently covered in tissue paper and making their way onto the walls and windows of both classrooms.

Class Information

Spelling

Spellings will continue on Tuesdays. Please can you ensure that pupils bring their spelling books back on Tuesday for the new words to be added. It would be beneficial if you would sign the page to acknowledge that the spellings have been learnt. House points are awarded for books returned and signed.

Reading Books

It is important to listen to your child read as often as possible. This will help them further develop their oracy skills and vocabulary. Please could you ensure that Home Reading books are brought into school at least once per week.

Home Learning

Thank you for the fantastic home learning that has been coming into school. If pupils could continue to complete the shaded squares, and then choose any of the other activities on the grid in addition to these.

Sunflowers have been sent home for half term. Why not plant them in the garden and continue to monitor its development?

Have a lovely half term and see you in June!

Mrs. Davies and Mr. Richards.
